Divy Yadav

AI Engineer & Technical Writer | Simplifying RAG, Agentic AI, LLMs |
Production AI for real-world use | Freelance
Gurugram, Haryana, India

Summary

I build AI systems focused on real-world deployment and production reliability. I work on:

- Agentic AI systems
- RAG pipelines
- Guardrails and evaluation
- Infrastructure for scalable AI applications

My focus is on building systems that work under real constraints. Alongside building, I write technical content that breaks down how these systems are designed, where they fail, and how to improve them using clear explanations and visual diagrams.

Experience

AI Engineering Simplified
Founder & Editor
April 2026 - Present (4 months)
India

AI Engineering Simplified — Founder & Editor

- Founded a technical newsletter covering production AI systems — RAG pipelines, agentic AI, LLM evaluation, and deployment patterns
- Write in-depth breakdowns of real-world AI engineering with visual diagrams and working code examples
- Growing subscriber base of AI engineers, developers, and ML practitioners

Unstrat

Technical Writer and Developer
June 2026 - Present (2 months)

Tensorlake

Technical writer and Developer
May 2026 - Present (3 months)

Superteams.ai

Technical writer and Developer
May 2026 - Present (3 months)

GirlScript Summer of Code
Open Source Developer
May 2026 - Present (3 months)

YouTube
Content Creator
May 2026 - Present (3 months)

Indie Hacker
May 2026 - Present (3 months)

Tripo AI
Technichal Advocate
April 2026 - Present (4 months)

Hashnode
Technichal writer
March 2026 - Present (5 months)

Medium
Freelance Technical Writer
January 2026 - Present (7 months)

- Write technical articles on AI engineering topics — RAG systems, LLM deployment, agentic AI design patterns, and production reliability
- Consistent publishing track record over 6+ months reaching developer and ML practitioner audiences

The Commerce Association, Sri Venkateswara College
Member
2023 - November 2025 (2 years)

GreenBhumi
Fund Researcher
